

Subject: Request for CRM Data Export (AI CRM Brain Project)

Hi [IT/CRM Admin Name],

I am working on the new "AI CRM Brain" project. We are building a Machine Learning model designed to predict deal closure probabilities and generate next-step recommendations for the sales team.

To train our initial model, I need a sample export of historical, **structured data** from our CRM.

Requirements for the Export:

- **Format:** CSV or Excel.
- **Timeframe:** Deals closed (Won or Lost) within the last 12 to 24 months.
- **Scope:** Please include a mix of both successful (Closed Won) and unsuccessful (Closed Lost) deals.

Please include the following data categories and specific fields:

1. Sales History & Deal Values (قيم ومراحل الصفقات):

- Deal Name / Deal ID
- Deal Amount (Value)
- Deal Stage (Final stage reached)
- Deal Status (e.g., Closed Won, Closed Lost)
- Creation Date (When the deal was opened)
- Closing Date (When the deal was officially won or lost)

2. Contact & Company Information (معلومات الاتصال):

- Account Name (Company Name)
- Industry
- Company Size (Revenue or Employee count, if available)
- Contact Job Title (e.g., CEO, Director)
- Lead Source (e.g., Website, Referral, Cold Call)

3. Interaction Logs (سجلات التفاعل):

- Total Emails (Number of emails sent/received for this deal)
- Total Calls/Meetings (Number of logged calls or meetings)

Please let me know if you have any questions or if we need to hop on a quick call to map these fields to our specific CRM setup.

Thanks,

Tamer Elkot
